

Wireless Network Access Instructions for SummerSchool 2025

1. Wireless Networks

Two dedicated Wi-Fi networks are available throughout the conference venue (International Center for Academic Exchange and dining hall):

- 1) Primary Network: Named "近物所河桥园区 (IMP_HZHQ)", it requires authentication with a personal account and password.
- 2) Temporary Network: Named "近代物理所惠州研究部", this open network provides basic internet access with limited bandwidth and session duration. It's designed for devices unable to access the authentication portal.

2. User Account and Authentication

- 1) Personal accounts are pre-generated based on the list of conference attendees. The account the wireless access is the same as the email username, excluding the @ and subsequent parts. For example, someone's email address is *james.smith@gmail.com*, then his wireless username is *james.smith*. The default password is uniformly set to "summerschool2025".
- 2) Access via "eduroam" authentication is supported.
- 3) Unregistered users may access the campus guest network "近物所 guest" by logging in with a mobile number and SMS verification code.
