

# The 17th International Symposium on Origin of Matter and Evolution of Galaxies

Contribution ID: 56

Type: **Oral Talk**

## PandaX Dark Matter and Neutrino Physics Program

*Sunday, 8 September 2024 15:15 (15 minutes)*

Dark matter and neutrinos are essential ingredients in the evolution of the Universe. The PandaX collaboration has built a series of xenon-based time projection chambers (XeTPC) to search for dark matter particles, neutrinoless double beta decay, and astrophysical neutrino signals. PandaX-4T is currently running, and we released the second dataset in summer 2024. This talk highlights recent dark matter searches, solar axion, and solar neutrino results.
