

# The 17th International Symposium on Origin of Matter and Evolution of Galaxies

Contribution ID: 101

Type: **Invited Talk**

## Exploring the Milky Way with LAMOST Survey

*Monday 9 September 2024 11:50 (25 minutes)*

The formation and evolution of the Milky Way have always been cutting-edge fields in contemporary astronomy, while large-scale surveys provide us unexpected opportunities to deeply explore our home galaxy. This talk will briefly introduce the new picture of the Milky Way presented based on the huge LAMOST database. From chemical enrichment to the formation history, the LAMOST spectroscopic survey helps reveal some of our latest understandings in the field of stellar and Galactic science.
