International Conference on Nuclear Physics at Storage Rings Sept. 14 - 18, 2008, Lanzhou, China

## First Circular

September 17, 2007

Dear Colleagues,

As a member of the world-wide community developing research and applications around storage rings, you are cordially invited to the 7<sup>th</sup> International Conference on Nuclear Physics at Storage Rings, STORI'08, September 14 - 18, 2008 at Lanzhou, China.

STORI'08 will be organized by the Institute of Modern Physics, Chinese Academy of Sciences and take place at Lanzhou, the capital of Gansu province of China. The dates for the conference will be from Sunday, September 14, 2008 until Thursday, September 18, 2008 just after [the 29<sup>th</sup> Olympic Games](#) held in Beijing.

STORI'08 will be the 7<sup>th</sup> International Conference on Nuclear Physics at Storage Rings. STORI conferences started as a Symposium on Nuclear Physics at Storage Rings in 1991 (Lund, Chair: Bo Jakobsson) and 1994 (St. Petersburg, Oleg Lozhkin), and - after being renamed - took place in 1996 (Bernkastel-Kues, Fritz Bosch, Peter Egelhof), in 1999 (Bloomington, Hans-Otto Meyer), in 2002 (Uppsala, Curt Ekström), and in 2005 (Jülich-Bonn, Hans Ströher).

The aim of the conference is to provide a forum for the presentation and discussion of all aspects of nuclear physics at storage rings with possible extensions to adjacent fields such as atomic and elementary particle physics. The conference topics are physics with stored polarized and cooled beams, techniques at storage rings, and present and future facilities. The scientific program will be composed to attract participants, ranging from established world leading scientists to PhD students.

Please distribute this announcement to colleagues who may not have received it, and we apologize if you are receiving this message more than once.

Looking forward to seeing you at Lanzhou in September 2008.

Your sincerely, The organizers
